

GMP Biorepository Services

Dedicated to store various client materials such as cell banks and antibodies, LakePharma's biorepository facility offers segregated storage areas that are fully validated and GMP compliant.

Key Features

Various storage conditions available

- LN₂ vapor phase, ultra cold -80°C, -20°C, or 2-8°C
- Custom conditions upon request

Robust security procedures to safeguard samples

- 24/7 emergency alarm monitoring systems
- Secure access via controlled key cards
- Comprehensive emergency recovery procedures
- Redundant temperature-controlled storage units
- Extensive back-up generator systems

Secured, cloud-based portal allows viewing of samples

- Sample delivery requests can be made within the portal

Overnight delivery of samples to your lab

- Sample arrival by 10AM within anywhere in the contiguous US
- Same day delivery is available for some regions

Why GMP Storage?

- Natural disasters and blackouts can happen. Storing samples in a GMP environment ensures sample protection, avoiding loss of millions of dollars and years of recovery.
- No more missing samples. Location of samples are always tracked.
- Free up lab space by storing long-term samples offsite at LakePharma's biorepository facility.

Frequently Asked Questions

Are the samples safe at LakePharma?

The LakePharma biorepository facility at Hopkinton, MA is fully GMP compliant. The site has all the required safeguards and backup systems to ensure the safety and well-being of client samples.

What information is needed in order to store biological samples with LakePharma?

Number of samples, sample types, expected duration of storage, storage conditions, shipping container requirements, and method of shipment. Any other information that is important for proper storage and shipping conditions is also needed.

Will I have access to view my own samples?

Yes. LakePharma offers a client portal which provides authorized users direct online access to their samples.

If I want samples to be sent back to my facility, how long will it take?

If the request is made by 10:00 AM ET, samples can be delivered by 10:00 AM local time on the next business day to anywhere within the contiguous United States.

If my facility is located in the Cambridge or Boston area, can I have same day access to my samples?

Yes. LakePharma employs a certified local company for regional sample shipments.

If my samples require storage conditions that are not listed, can LakePharma still work with me?

Absolutely. LakePharma will evaluate each request to see if accommodations are possible.

Who will be my contact at LakePharma when I have a question?

LakePharma's Business Development Executive will be the direct contact during the early engagement process. Once the order has been processed, LakePharma will immediately assign a Project Manager, who will be the day-to-day contact.

How much will it cost to store samples at LakePharma?

LakePharma's Business Development Executive will work directly with the client to assess needs and develop a proper proposal.
